A CERAMIC LOVE STORY SINCE 1988.

UNA STORIA DI PASSIONE PER LA CERAMICA DAL 1988.

Il marchio NovaBell è indissolubilmente legato alla famiglia Bellei. Il fondatore, Silvio Bellei, è stato fin dagli anni '50 tra i principali protagonisti dell'industria ceramica italiana, partecipando allo sviluppo di alcune tra le più importanti aziende del settore. Oggi NovaBell è un'eccellenza ceramica, un modello di impresa impegnato nel miglioramento continuo dell'efficienza dei processi produttivi e delle performance ambientali, elementi determinanti per ottenere prodotti di qualità.

A CERAMIC LOVE STORY SINCE 1988.

The NovaBell brand is inextricably linked to the Bellei family. Its founder, Silvio Bellei, played a leading role in the Italian ceramic industry from the 1950s onwards, contributing to the development of some of the most important companies in the sector. Today NovaBell stands for excellence in the ceramics industry, a business model committed to continual improvement in the efficiency of production processes and environmental performance, crucial for the manufacture of quality products.

UNE HISTOIRE DE PASSION POUR LA CÉRAMIQUE DEPUIS 1988.

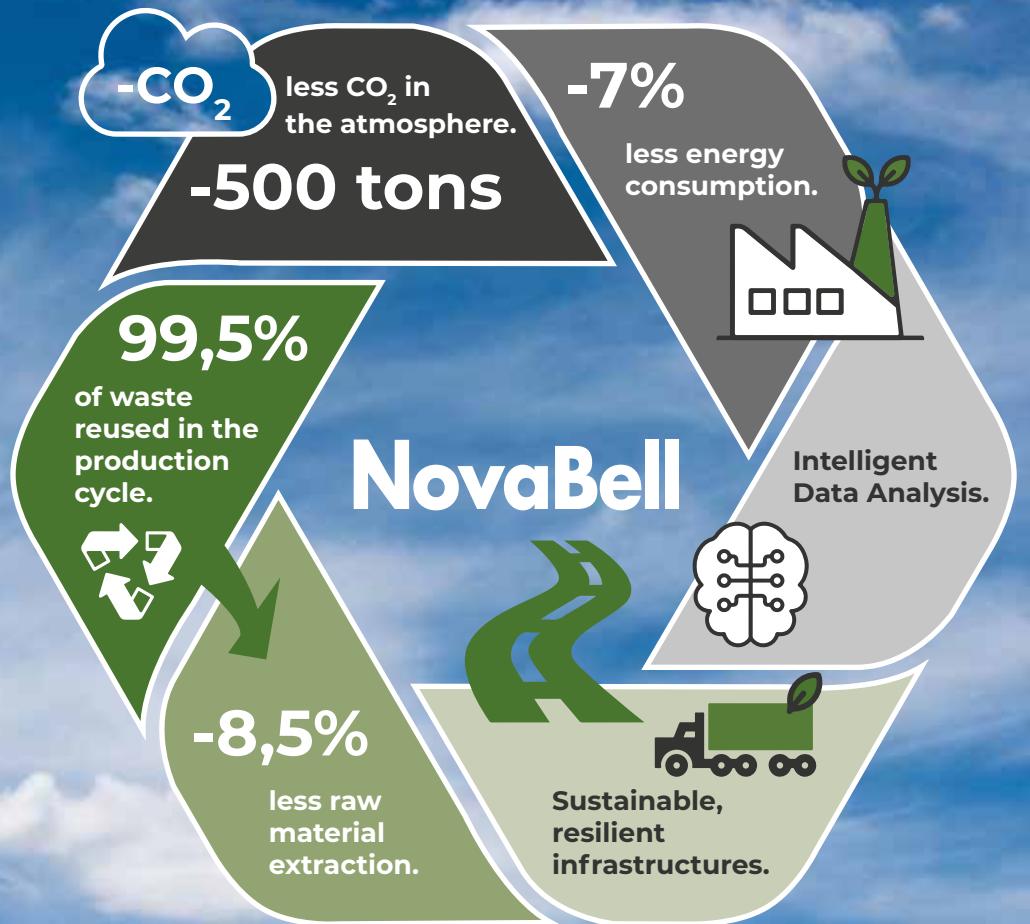

La famille Bellei est indissolublement liée à la marque NovaBell. Dès les années 50, son fondateur, Silvio Bellei, est déjà l'un des acteurs majeurs de l'industrie céramique italienne, contribuant largement au développement de plusieurs grandes entreprises du secteur. NovaBell est aujourd'hui une excellente céramique, un modèle d'entreprise engagé à optimiser sans cesse l'efficacité de ses procédés de production et de ses performances environnementales, soit des éléments essentiels pour fabriquer des produits de qualité.

KERAMIK AUS LEIDENSCHAFT, EIN UNTERNEHMEN SCHREIBT GESCHICHTE - SEIT 1988.

Die Marke NovaBell ist untrennbar mit der Familie Bellei verknüpft. Der Gründer Silvio Bellei gehörte bereits in den 50er Jahren zu den Schlüsselfiguren der italienischen Keramikindustrie, da er an der Entwicklung einiger der renommiertesten Branchenunternehmen beteiligt war. NovaBell steht heute für hochwertige Keramik. Das Geschäftsmodell setzt auf eine Verbesserung der Produktionseffizienz und des Umweltprofils, entscheidende Elemente für die Erzielung von Qualitätsprodukten.

SMART FACTORY: TANGIBLE, MEASURABLE SUSTAINABILITY.

SMART FACTORY: LA SOSTENIBILITÀ CONCRETA E MISURABILE.

La componente ambientale ha assunto un peso sempre più rilevante nella programmazione e negli investimenti NovaBell. L'ampliamento dello stabilimento, le tecnologie 4.0 e le nuove infrastrutture nascono da un vero e proprio ripensamento dell'intero processo industriale che vede la sostenibilità come una priorità strategica. L'azienda contribuisce attivamente attraverso una serie di azioni concrete e misurabili:

- riduzione pari a 500 tonnellate di CO₂ l'anno
- riduzione del 7% dei consumi energetici
- 99,5% degli scarti recuperati nel ciclo produttivo
- 8,5% in meno di estrazione di materie prime
- digitalizzazione 4.0 per innovare processi, prodotti e servizi
- nuova viabilità e infrastrutture resilienti.

SMART FACTORY : LA DURABILITÉ CONCRÈTE ET MESURABLE.

La composante environnementale joue un rôle de plus en plus important dans la programmation et les investissements NovaBell. L'agrandissement de l'usine, les technologies 4.0 et les nouvelles infrastructures reposent sur la révision complète de tout le procédé industriel qui pose comme priorité stratégique la durabilité. L'entreprise s'engage activement par une série d'actions concrètes et mesurables :

- réduction de 500 tonnes de CO₂ par an
- réduction de 7 % des consommations énergétiques
- récupération de 99,5 % des déchets dans le cycle de production
- 8,5 % en moins d'extraction de matières premières
- digitalisation 4.0 pour innover procédés, produits et services
- nouvelle gestion de la circulation et infrastructures résilientes.

SMART FACTORY: LA SOSTENIBILITÀ CONCRETA E MISURABILE.

The environmental factor has become more and more important in NovaBell's planning and investments. The expansion of its plant, its industry 4.0 technologies and its new infrastructures originate from a genuine rethink of the entire industrial process, which sees sustainability as a strategic priority. The company makes an active contribution through a series of real, measurable actions:

- reduction of 500 tons per year in CO₂ emissions
- 7% reduction in energy use
- 99.5% of waste reused in the production cycle
- 8.5% less raw material extraction
- digitalisation 4.0 to innovate processes, products and services
- new road network and resilient infrastructures.

SMART FACTORY: KONKRETE UND MESSBARE NACHHALTIGKEIT.

Durch weitsichtige Planung und Investitionen hat sich NovaBell ambitionierten Umweltzielen verschrieben. Der Ausbau des Werks, die 4.0-Technologien und die neuen Infrastrukturen sind das Ergebnis einer Neukonzeption der gesamten industriellen Fertigung, bei der Nachhaltigkeit strategische Priorität hat. Durch eine Reihe konkreter und messbarer Maßnahmen leistet das Unternehmen einen aktiven Beitrag zum Umweltschutz:

- 500 Tonnen CO₂-Reduzierung pro Jahr
- Verringerung des Energieverbrauchs um 7 %
- 99,5 % der Abfälle aus dem Fertigungsprozess werden wiederverwendet
- 8,5 % weniger Rohstoffabbau
- Digitalisierung 4.0 im Hinblick auf innovative Prozesse, Produkte und Dienstleistungen
- Neues Straßen- und Wegenetz sowie resiliente Infrastrukturen.

QUALITY AND SUSTAINABLE AND CIRCULAR DEVELOPMENT.

Emission control.
/ Controllo delle emissioni.

Water and energy consumption control.
/ Controllo dei consumi idrici ed energetici.

Internal wastewater recycling.
/ Riciclo interno delle acque reflue.

Innovative technologies.
/ Innovative tecnologie.

Compliance with minimum noise levels.
/ Rispetto dei livelli minimi di rumorosità.

Systematic control and maintenance.
/ Controllo e manutenzione sistematica.

Ongoing employee training.
/ Formazione costante dei dipendenti.

QUALITÀ E SVILUPPO SOSTENIBILE E CIRCOLARE.

Per NovaBell l'economia circolare rappresenta un nuovo paradigma, un sistema che mette al primo posto la riduzione e il controllo degli scarti di lavorazione. L'azienda riutilizza la quasi totalità delle acque reflue e degli scarti di lavorazione e identifica attraverso il marchio "NovaBell Ecosystem" i prodotti che contengono almeno il 40% di materiale riciclato. Il gres porcellanato ha una qualità altissima e un impatto molto contenuto grazie a processi che mettono al primo posto l'ambiente e l'uomo.

NovaBell è un modello di impresa che ha a cuore la sostenibilità sociale, oltre quella ambientale, la sicurezza dei lavoratori e la loro formazione sono una priorità strategica insieme ad una manutenzione puntuale e costante di tutti gli impianti produttivi.

QUALITÉ ET DÉVELOPPEMENT DURABLE ET CIRCONNAIRE.

L'économie circulaire représente, pour NovaBell, un nouveau paradigme, un système qui met au premier plan la réduction et le contrôle des déchets de production. L'entreprise réutilise la quasi-totalité des effluents et des déchets de production, et elle identifie avec la marque « NovaBell Ecosystem » les produits avec un contenu recyclé minimum de 40 %. Issu de procédés considérant l'environnement et l'homme comme de première importance, le grès céramique possède une qualité très élevée et exerce un impact très limité.

NovaBell est un modèle d'entreprise qui a à cœur, non seulement la durabilité environnementale, mais aussi la durabilité sociale. En effet, la sécurité des employés et leur formation constituent des priorités stratégiques, et tous les sites de production reçoivent une maintenance régulière et constante.

QUALITY AND SUSTAINABLE AND CIRCULAR DEVELOPMENT.

For NovaBell the circular economy is a new paradigm, a system that prioritises the reduction and control of processing waste. The company reuses almost all wastewater and processing waste and uses its 'NovaBell Ecosystem' label to identify products that contain at least 40% recycled material. Its porcelain stoneware is of outstanding quality and has very low impact thanks to processes that put the environment and people first.

NovaBell adopts a business model built around social as well as environmental sustainability: workers' safety and training are a strategic priority, together with constant, regular maintenance of all production plants.

QUALITÄT, NACHHALTIGE ENTWICKLUNG UND KREISLAUFWIRTSCHAFT.

Für NovaBell verkörpert die Kreislaufwirtschaft ein neues Paradigma, ein System, das die Reduzierung und Kontrolle des Abfallvolumens in den Vordergrund stellt. Angesichts der Wiederverwendung nahezu aller Abwasser und Verarbeitungsausschüsse kennzeichnet das Unternehmen mit dem Markenzeichen „NovaBell Ecosystem“ jene Produkte, die einen Recyclinganteil von mindestens 40 % aufweisen.

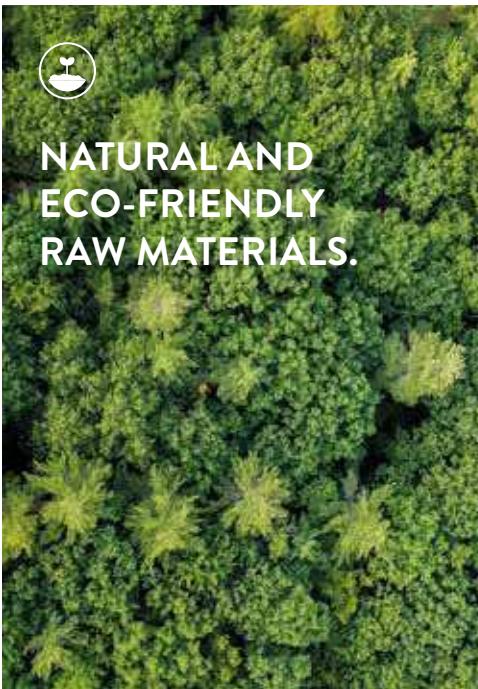

Dank Verfahren, die die Umwelt und den Menschen in den Mittelpunkt stellen, zeichnet sich das Feinsteinzeug durch höchste Qualität und sehr geringe Umweltauswirkungen aus. NovaBell steht für ein Geschäftsmodell mit Fokus auf sozialer und ökologischer Nachhaltigkeit. Dabei haben die Sicherheit und das Training der Mitarbeiter wie auch die fristgerechte und regelmäßige Wartung aller Produktionsanlagen oberste Priorität.

ONE PLANET,
ONE GOAL:
TO PROTECT IT.

WE AVOID WASTE
AND REDUCE
CONSUMPTION
BECAUSE
WATER IS LIFE.

NATURAL AND
ECO-FRIENDLY
RAW MATERIALS.

OUTDOOR COMPLETE PROJECT

Ogni accessorio **NovaBell** è stato pensato per coordinarsi alle pavimentazioni e completare **aree piscina, scale, muretti, ogni tipo di camminamento e tutte le esigenze dell'outdoor living.**

Every accessory is designed to match the floor coverings and pavings and to complete **swimming-pool areas, staircases, low walls, all kinds of paths and all the needs of outdoor living.**

Chaque accessoire a été mis au point pour se coordonner au revêtement de sol et pour compléter les zones de piscine, **les escaliers, les murets, tout type de cheminement et tous les cadres de vie en plein air.**

Alle Einrichtungsaccessoires sind auf die Bodenbeläge abgestimmt. Sie runden die Gestaltungskonzepte für **Poolbereiche, Treppen, halbhöhe Mauern und Gehwegen** ab und werden sämtlichen Anforderungen des **Outdoor-Livings** gerecht.

MULTISIZE PRONTO ALL'USO

NovaBell si impegna costantemente nel servizio e assistenza al cliente. Per gli articoli **MULTIFORMATO**, le proporzioni di posa, sono state calcolate e organizzate in pallet pronti all'uso. Questo servizio regala velocità di installazione e risparmio di tempo.

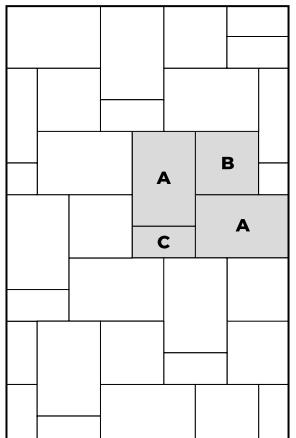

MULTISIZE READY FOR USE.
NovaBell provides constant customer service and assistance. For **MULTI-SIZE** modules, the installation proportions are calculated and organized in ready-to-use pallets. This service speeds up the installation process and saves time.

TAILLES MULTIPLES PRÈTES À L'EMPLOI.
NovaBell est constamment engagée au service et l'assistance de la clientèle. Pour les articles **MULTIFORMAT**, les proportions de pose ont été calculées et organisées en palettes prêtes à l'emploi. Ce service permet rapidité d'installation et gain de temps.

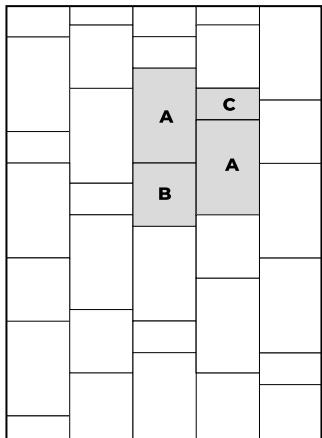

GEBRAUCHSFERTIGE MULTISIZE-FORMATE.
NovaBell steht konstant im Dienst des Kunden und bietet in diesem Sinn entsprechende Leistungen. Hinsichtlich der **MEHRFORMATIGEN** Artikel werden die Verlegeproportionen passend berechnet und auf verarbeitungsfertigen Paletten organisiert. Dieser Service gewährleistet eine rasche Verlegung und Zeitsparnis.

Laying scheme Multisize 1

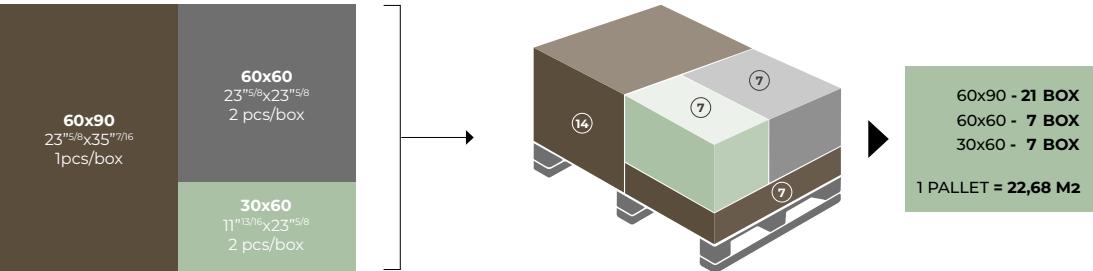

Laying scheme Multisize 2 (random)

A 60x90 = 66,67%

B 60x60 = 22,22%

C 30x60 = 11,11%

MULTISIZE PLUS

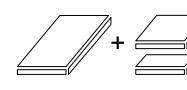

Economia sul costo dei trasporti e sullo spazio in magazzino
• 1 Sola paletta con tutti i formati

Optimization of transportation costs and warehouse space
• 1 Single pallet with all sizes on it

Économie sur le coût des transports et sur l'emplacement dans le stock
• 1 Palette simple toutes tailles

Wirtschaftliche Transportkosten und Lagerhaltung
• Nur 1 Palette mit allen Formaten

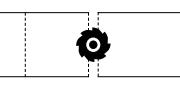

Tutto il materiale viene utilizzato non ci sono rimanenze in magazzino

All the material is used there are no left over

Tout le matériel est utilisé il n'y a pas d'inventaire dans l'entrepôt

Das gesamte Material wird verwendet. Keine Vorratshaltung

Tutti i formati sono ricavati dalla lastra 60x180x2 cm
• Non ci sono differenze di tono

• Non ci sono differenze di superficie al tatto

Every size is obtained from the 60x180x2 cm slab
• There are no shade differences

• There are no differences of surface to the touch

Toutes les tailles sont obtenues à partir de la dalle 60x180x2 cm
• Il n'y a aucune différence de nuance

• Il n'y a aucune différence de surface au toucher

Alle Formate werden aus der Platte im Format 60x180x2 cm gefertigt
• Es gibt keine Farbtonabweichungen

• Die Oberflächen weisen keine haptischen Unterschiede auf

• La paletta è stata studiata in modo che le scatole vengano prelevate da un solo operatore
• La paletta rimane sempre stabile perché le scatole sono appoggiate in orizzontale

• The pallet has been studied so that the boxes can be taken from a single operator
• The pallet is always stable because the boxes are laid horizontally

• La palette a été étudiée afin que les boîtes sont manipulées par un opérateur unique

• La palette reste toujours stable parce que les boîtes sont placé en horizontal

• DiePalette wurde so entwickelt, dass die Kartons von einem einzigen Arbeiter entnommen werden können

• Die Palette bewahrt stets ihre Stabilität, da die Kartons waagrecht angeordnet sind

GLI SVANTAGGI DEL
**MULTIFORMATO A PALETTA
SINGOLE** / DISADVANTAGES OF
THE MULTISIZE PATTERN WHEN
EACH SIZE IS ON ITS OWN PALLET /
DESAVANTAGES DES PALETTES
SIMPLES EN MULTIFORMAT / DIE
NACHTEILE DES MULTIFORMATS
MIT EINZELPALETTEN

I toni e la mano superficiale possono essere diversi.
• Nell'eseguire un lavoro in cantiere occorre fare i conti di quante scatole prelevare da ogni singola paletta.
• Spesso le scatole sono disposte sia in verticale che orizzontale e quindi occorrono due operatori.
• I formati hanno percentuali diverse di utilizzo, quindi rimangono più scarti.

Les nuances et la main de la surface peuvent être différentes.
• Pour réaliser des travaux sur le chantier, il est nécessaire de calculer combien de boîtes prendre par chaque format sur les différentes palettes.
• Souvent, les boîtes sont fournies à la fois en verticale et horizontale vous avez besoin de deux opérateurs.
• Les formats ont des pourcentages différents d'utilisation donc il y a plus de déchets.

Shades and touch of the surface can be different.
• When installing material you need to count how many boxes you will need from each pallet.
• Often the boxes are laid both vertically and horizontally on the pallet therefore you need two operators.
• Each size has different percentage of use, therefore there will be leftovers.

Farbtöne und Haptik der Oberflächen können Unterschiede aufweisen.
• Bei der Ausführung einer Arbeit auf der Baustelle muss berechnet werden, wie viele Kartons von jeder einzelnen Palette zu entnehmen sind.
• Häufig sind die Kartons sowohl senkrecht als auch waagrecht angeordnet, weswegen zwei Arbeiter zur Entnahme erforderlich sind.
• Die Formate werden prozentual unterschiedlich genutzt, weshalb mehr Ausschuss anfällt.

FENCE & PALISSADES

Le palizzate rappresentano una soluzione moderna e innovativa per delimitare qualsiasi area esterna. NovaBell offre una ampia gamma di prodotti in gres porcellanato ad effetto legno ed effetto pietra, costituito da lastre accoppiate di spessore 20 MM, anche in continuità con la pavimentazione esterna.

Fence are a modern and innovative solution for enclosing any outdoor area. NovaBell offers a wide range of porcelain stoneware products with a wood and stone effect, consisting of 20 mm-thick laminated slabs, including a seamless solution with outdoor paving.

Les palissades constituent une solution moderne et avant-gardiste pour délimiter n'importe quel espace extérieur. NovaBell propose une grande variété de produits en grès céramique effet bois et effet pierre, composés de dalles contrecollées de 20 mm d'épaisseur, cette fois aussi en continuité visuelle avec le revêtement de sol extérieur.

Die Palisaden repräsentieren eine moderne und innovative Lösung zur Begrenzung jeder beliebigen Fläche im Außenbereich. NovaBell verfügt über ein umfassendes Angebot an Feinsteinzeugprodukten in Holz- und Natursteinoptik mit zusammengesetzten Platten von 20 mm Stärke, die auch passend zum Outdoor-Belag ausgewählt werden können.

ACCESSORIES BRICKUP

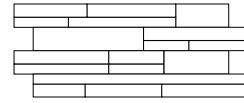

BRICKUP è il progetto di rivestimenti tridimensionali che unisce il design delle materie naturali e tutta la praticità del gres porcellanato NovaBell.
Le vigorose superfici **BRICKUP** disegnano pareti caratterizzate da un grande realismo, sono adatte a tutti gli usi, per esterno ed interno.

BRICKUP is the three-dimensional covering project that combines the look of natural materials with all the convenience of NovaBell porcelain stoneware.
Vibrant **BRICKUP** surfaces create strikingly realistic walls, and are suitable for all uses, both indoors and outdoors.

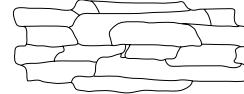

BRICKUP est le projet de carreaux muraux tridimensionnels conciliant le look des matières naturelles avec l'utilité pratique du grès cérame NovaBell.
Les surfaces dynamiques **BRICKUP** forment des murs flanqués d'un grand réalisme, se prêtent à tous les usages, en extérieur et en intérieur.

BRICKUP ist das Konzept für dreidimensionale Wandbeläge, das ein von natürlichen Materialien inspiriertes Design mit der hohen Funktionalität des Feinsteinzeugs von NovaBell vereint.
Das attraktive Oberflächen-Design von **BRICKUP** erzeugen einen besonders realistischen Eindruck an Wänden und bieten vielfältige Einsatzmöglichkeiten im Außen- und Innenbereich.

NOVITÀ - NEW - NOUVEAUTÉ - NEU

NovaBell OutWalk

3cm
↓

L'eccellenza resistenza del 20mm diventa superlativa nella versione 30mm.

I nuovi prodotti Outwalk30, grazie al peso superiore delle lastre ed allo spessore maggiorato a 30 mm, oltre ai metodi tradizionali di posa e destinazione d'uso del 20mm, permettono l'utilizzo a secco anche per uso carrabile leggero. Non è più perciò necessario l'incollaggio delle lastre.

Utilizzo / Intended use / Possibilités d'usage / Anwendungsbereiche

La posa di Outwalk30 su una superficie di stabilizzato di sabbia o ghiaiaio spaccato compattati e preparati a dovere, deve prevedere sempre l'utilizzo di distanziatori in materiale plastico.

Installation of Outwalk30 on a surface of compacted sand or split gravel must always include the use of plastic clips.

Sur les surfaces en sable stabilisé ou en gravier stabilisé, compactées et préparées dans les règles de l'art, les produits Outwalk30 doivent toujours être posés avec des croisillons en plastique.

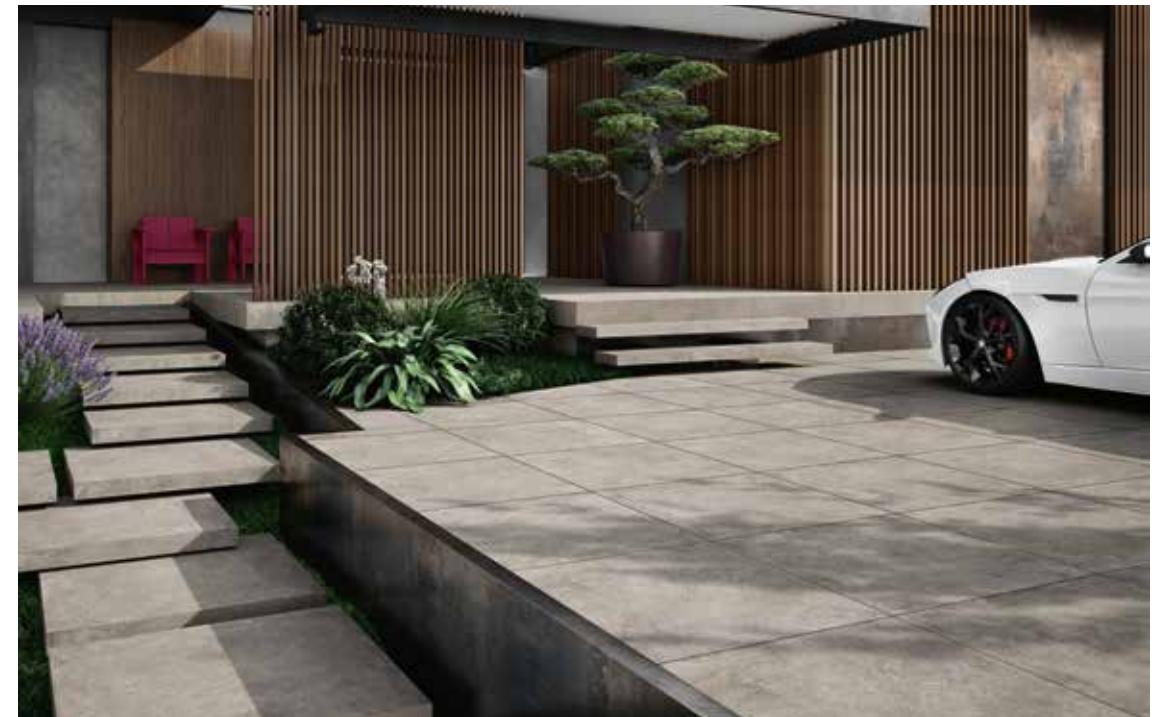

Bei der Verlegung von Outwalk30 auf einer mit Sand, Schotter oder Kies stabilisierten und nach Gebühr verdichteten und vorbereiteten Oberfläche sind stets entsprechende Abstandhalter-Verlegehilfen aus Kunststoff vorzusehen.

The exceptional strength of the 20 mm version is superlative in the 30 mm.
The new Outwalk30 products, thanks to the higher weight of the slabs and the 30 mm extra thickness, in addition to traditional installation methods and use of the 20 mm, **allow dry use even for light drive-over areas**. It is therefore no longer necessary to glue the slabs together.

| ANTRACITE | OP 288R | OP 260R | |

L'extraordinaire résistance du 20 mm devient superlative dans la version 30 mm.
En raison du poids plus important des dalles et de leur grande épaisseur de 30 mm, les nouveaux produits Outwalk30 peuvent être posés non seulement de manière traditionnelle et pour les applications du 20 mm, **mais aussi à sec, y compris sur les surfaces exposées à la circulation peu fréquente de véhicules**. Les dalles ne doivent plus être collées.

Die außerordentliche Widerstandsfähigkeit der 20-mm-Ausführung wird von der 30-mm-Version noch bei weitem übertroffen.
Dank des höheren Gewichts der Platten und der größeren Stärke von 30 mm können die neuen Produkte Outwalk30 nicht nur nach traditionellen Methoden verlegt und wie die 20-mm-Versionen eingesetzt, sondern auch im Trockenverfahren verlegt werden, sodass ggf. auch leichte Fahrzeuge darüber fahren können. Die Verlegung in Mörtel oder mit Kleber ist somit nicht zwingend erforderlich.

LOOK ETEROGENI.

Legno, pietra, cemento: il gres porcellanato NovaBell evolve tecnologicamente per esprimere linguaggi estetici contemporanei. Le superfici per esterno OutWalk restituiscono spazi coinvolgenti e naturali.

A VARIETY OF LOOKS.

Wood, stone, concrete: NovaBell porcelain stoneware evolves its technologies to express contemporary aesthetic languages. OutWalk outdoor surfaces create enticing, natural spaces.

ALLURES HÉTÉROGÈNES.

Bois, pierre, béton : le grès cérame NovaBell passe par une évolution technologique pour exprimer les langages esthétiques d'aujourd'hui. Les surfaces pour extérieur OutWalk dessinent des cadres séduisants et naturels.

VIELFÄLTIGE LOOKS.

Holz, Stein, Beton: Feinsteinzeug von NovaBell steht für zeitgemäßes Design, das auf einer kontinuierlichen technologischen Weiterentwicklung basiert. Die Outdoor-Beläge OutWalk schaffen ansprechende und natürlich wirkende Flächen im Außenraum.

POSA A SECCO SU ERBA*

DRY INSTALLATION ON GRASS

IT PREPARAZIONE
Appoggiare le lastre "in prova" verificandone la disposizione ottimale. Con una vanga, incidere il terreno lungo il perimetro di ogni lastra. Togliere le lastre e in corrispondenza rimuovere il terreno per circa 6 cm.

SOTTOFONDO
Nelle aree scavate, posizionare uno strato di ghiaietto (grana 0,5-1 cm) per livellare il sottofondo e renderlo stabile.

POSA
Appoggiare le lastre assicurandosi che il piano di calpestio sia a livello del terreno o leggermente più basso.

FUGA
Se necessario, compattare il terreno lungo i bordi delle lastre con un martelletto in gomma.

EN PREPARATION
Try out the arrangement of the slabs on the grass to find the best layout. Cut the ground around the edge of each slab with the aid of a spade. Remove the slabs and dig out soil to a depth of about 6 cm in the installation position of each one.

SUBSTRATE
Add a layer of fine gravel (particle size 0.5-1 cm) in the hole made for each slab to provide a level, firm substrate.

INSTALLATION
Put the slabs in place, making sure that the top face is level with or slightly below the surface of the ground.

JOINTS
If necessary, compact the ground around the edges of the slabs with a rubber hammer.

FR PRÉPARATION
Déposer les dalles pour « tester » leur disposition et trouver la meilleure. Délimiter le périmètre de chaque dalle avec une bêche. Retirer les dalles et, à leur place, creuser le sol sur 6 cm de profondeur.

SUPPORT DE POSE
Dans les endroits creusés, mettre une couche de gravier (granulométrie 0,5-1 cm) pour niveler le support de pose et le stabiliser.

POSE
Déposer les dalles en veillant à ce que la surface du piétement soit exactement au même niveau que le sol ou à un niveau légèrement inférieur.

JOINTS
Le cas échéant, tasser le sol tout autour des dalles avec un maillet en caoutchouc.

DE VORBEREITUNG
Die Platten probeweise verlegen und ihre optimale Anordnung überprüfen. Mit einem Spaten um den äußeren Plattenrand eine Furche im Boden ziehen. Die Platten entfernen und den Bereich 6 cm tief ausheben.

UNTERGRUND
Den ausgehobenen Bereich mit einer Splittschicht (Korngröße 0,5-1 cm) verfüllen, um einen ebenen und stabilen Untergrund zu schaffen.

VERLEGUNG
Die Platten auf das Splittbett aufliegen und darauf achten, dass sich die Trittebene auf bzw. etwas unterhalb der Erdbodenebene befindet.

VERFUGUNG
Das Erdreich entlang der Plattenränder ggf. mit einem Gummihammer verdichten.

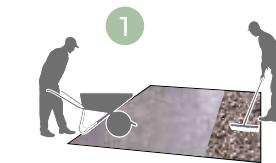

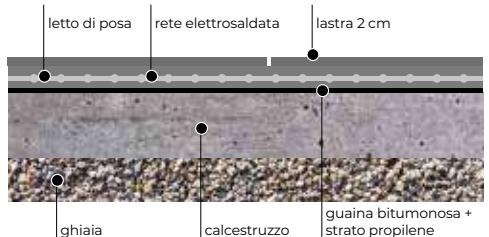

DISCLAIMER Tutte le presenti note sulla posa sono da intendersi come informazioni generiche sulle possibili applicazioni e utilizzazioni dell'investimento ceramico. Nel caso concreto le scelte sulla modalità di posa necessitano di adeguate valutazioni da parte di professionisti qualificati, in base alle caratteristiche specifiche del contesto, del tipo di traffico e delle normative vigenti. NovaBell pertanto declina ogni responsabilità.

DISCLAIMER All the installation advice which follows is provided as general guidance on the possible applications and uses of ceramic coverings. In each actual case, installation methods must be chosen on the basis of careful assessment by skilled professionals, considering the specific characteristics of the context, the type of traffic and the regulatory framework. NovaBell therefore declines all responsibility.

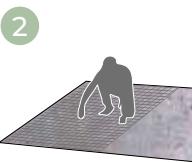

CLAUSE DE NON-RESPONSABILITÉ Les remarques et observations ci-après doivent être considérées comme des informations de nature générale sur les applications et utilisations possibles du revêtement céramique. Dans la pratique, la méthode de pose doit être évaluée par des professionnels qualifiés, selon les caractéristiques du projet, le type de trafic et les normes en vigueur. Dès lors, NovaBell décline toute responsabilité.

POSA A COLLA*

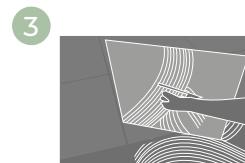

LAYING WITH ADHESIVES

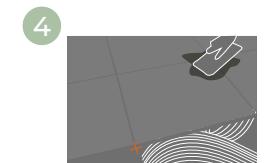

IT PREPARAZIONE
Predisporre uno strato compatto di ghiaia e pietrisco di almeno 10 cm (vespaio) sul quale effettuare una gettata di calcestruzzo con uno spessore adeguato (indicativamente di 15-20 cm). Qualora sia necessaria la impermeabilizzazione si posizionerà una idonea una guaina bituminosa coi sovrapporre uno strato di separazione in polietilene.

SOTTOFONDO
Stendere il letto di posa di 5-10 cm, posizionando una rete elettrosaldata circa alla metà dello spessore. Prevedere una adeguata pendenza (indicativamente il 2%). Rispettare scrupolosamente i tempi di maturazione e stabilizzazione.

POSA
Incollare le lastre con il metodo della doppia spalmatura, stendendo uno strato di colla sul sottofondo e sulla lastra. Utilizzare un adesivo per esterni ad alte prestazioni, specifico per gres porcellanato, seguendo le indicazioni del produttore. Prevedere i necessari giunti di dilatazione secondo le esigenze specifiche del contesto.

FUGA
Predisporre le fughe utilizzando appositi distanziatori di almeno 4-5 mm. Il riempitivo per fughe deve essere un prodotto specifico per applicazioni in esterno, applicato secondo le prescrizioni del produttore. Effettuare la pulizia dopo posa con apposito detergente per rimuovere ogni residuo di adesivo e fugante.

EN PREPARATION
Prepare a compact layer of gravel and hard core at least 10 cm deep (loose stone foundation) and cast a layer of concrete with a suitable thickness (usually about 15-20 cm) on top. If water proofing is required, a layer of bitumen membrane can be added, with a polyethylene separator sheathing on top.

SUBSTRATE
Create a substrate of 5-10 cm with a rebar mesh about halfway through its depth. Ensure a suitable pitch (about 2%). Comply strictly with curing and stabilisation times.

INSTALLATION
Glue the slabs in place, coating both the back of the slab and the substrate. Use a high-performance outdoor adhesive specifically for porcelain stoneware and follow the producer's instructions. Provide expansion joints as required by the specific context.

JOINTS
Create joints of at least 4-5 mm with the aid of suitable spacers. The joint filler must be a specific product for outdoor use, applied in accordance with the producer's instructions. Clean after installation with a specific cleaner to remove all traces of adhesive and grout.

EN PREPARATION
Prepare a compact layer of gravel and hard core at least 10 cm deep (loose stone foundation) and cast a layer of concrete with a suitable thickness (usually about 15-20 cm) on top. If water proofing is required, a layer of bitumen membrane can be added, with a polyethylene separator sheathing on top.

SUBSTRATE
Create a substrate of 5-10 cm with a rebar mesh about halfway through its depth. Ensure a suitable pitch (about 2%). Comply strictly with curing and stabilisation times.

INSTALLATION
Glue the slabs in place, coating both the back of the slab and the substrate. Use a high-performance outdoor adhesive specifically for porcelain stoneware and follow the producer's instructions. Provide expansion joints as required by the specific context.

JOINTS
Create joints of at least 4-5 mm with the aid of suitable spacers. The joint filler must be a specific product for outdoor use, applied in accordance with the producer's instructions. Clean after installation with a specific cleaner to remove all traces of adhesive and grout.

FR PRÉPARATION
Mettre une couche compacte de gravier et pierrière d'au moins 10 cm d'épaisseur (vidéo sanitaire), sur laquelle couler la bonne épaisseur de béton (approximativement 15-20 cm). Si l'imperméabilisation est nécessaire, appliquer un feutre bitumé avec, au-dessus, une couche de séparation en polyéthylène.

SUPPORT DE POSE
Réaliser le lit de pose sur une épaisseur de 5-10 cm et positionner un treillis soudé environ à la moitié de l'épaisseur. Prévoir une inclinaison appropriée (approximativement 2 %). Respecter scrupuleusement les temps de prise et de stabilisation.

POSE
Coller les dalles selon la méthode du double encollage, en appliquant une couche de colle sur le support de pose et une couche de colle sur la dalle. Utiliser un mortier-colle pour extérieur à haute performance, spécialement fait pour le grès cérame, en observant les instructions du fabricant. Prévoir les joints de dilatation nécessaires selon les exigences spécifiques du projet.

JOINTS
Réaliser des joints d'au moins 4-5 mm à l'aide de croisillons. Les joints doivent être remplis avec un mortier tout

DE VORBEREITUNG
Eine kompakte, mindestens 10 cm dicke Kies- und Splittschicht (Frostschutzschicht) aufzuschütten, auf die ein Betonbett eine geeignete Dicke (ca. 15-20 cm) aufgebracht wird. Für eine ggf. notwendige Abdichtung werden Bitumenabdichtungsbahnen verklebt, auf die eine Trennschicht auf Polyäthylen folgt.

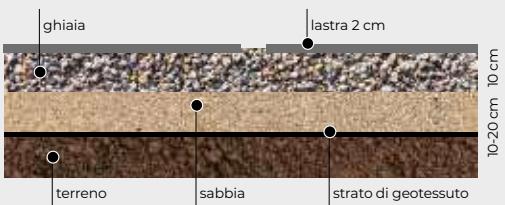

UNTERGRUND
Das Kleberbett mit einer Dicke von 5-10 cm auftragen. Auf halber Höhe des Kleberbetts eine Gittermatte einrollen. Es muss auf ein angemessenes Gefälle (ca. 2 %) geachtet werden. Aushärtungs- und Stabilisierungszeit sind streng zu beachten.

VERLEGUNG
Die Platten im Buttering-Floating-Verfahren, bei dem der Kleber auf dem Untergrund und der Plattenrückseite aufgetragen wird, verkleben. Einen Spezialkleber für Feinsteinzeug, der höchste Leistungsanforderungen erfüllt und für den Außenbereich geeignet ist, gemäß den Herstellerangaben verwenden. Gemäß den spezifischen Umgebungsbedingungen die notwendigen Dehnungsfugen berücksichtigen.

VERFUGUNG
Die Fliesen unter Verwendung von Fugenkreuzen mit einer Fugenbreite von mindestens 4-5 mm verlegen. Gemäß den Herstellerangaben mit einem Spezialmörtel für Außenbereiche verfügen. Nach der Verlegung mit einem hierfür geeigneten Reinigungsmittel alle Klebe- und Verfugrückstände entfernen.

POSA A SECCO SU GHIAIA *

DRY INSTALLATION ON GRAVEL

IT PREPARAZIONE

In caso di posa su terreno, asportare il terreno per uno spessore di 10-20cm; se il pavimento è adiacente a una zona erbosa o comunque non compatta è consigliabile installare una filetta di contenimento a vista o a scomparsa (in pietra, metallo o pvc). Livellare e compattare il piano utilizzando sabbia o terriccio. Il posizionamento di uno strato di geotessuto permette di separare il sottofondo dal terreno ed evita l'insorgenza di vegetazione infestante.

EN PREPARATION

If laying on soil, dig out to a depth of 10-20cm; if the paving adjoins grass or any other uncompacted surface, a visible or concealed containing kerb (in stone, metal or PVC) should be used. Level and compact the surface with sand or soil. A geotextile layer will separate the substrate from the soil and prevent the growth of weeds.

FR PRÉPARATION

Pour la pose en pleine terre, creuser le sol sur 10-20 cm de profondeur. Si le carrelage se trouve à proximité d'une zone d'herbe ou, quoi qu'il soit, d'une zone non compacte, il est recommandé d'installer une structure de confinement apparente ou invisible (en pierre, en métal ou en PVC). Niveler et tasser la surface de pose avec du sable ou du terreau. L'application d'un géotextile permet de séparer le support du sol naturel et empêche la végétation d'envhair le carrelage.

DE VORBEREITUNG

Auf Verlegung auf dem Erdboden ist eine 10-20 cm tiefe Aushebung erforderlich. Wenn der Belag an einer Grünfläche bzw. eine unverfestigte Fläche angrenzt, ist eine erhöhte oder bodenebene Umfriedung (aus Stein, Metall oder PVC) anzulegen. Den Untergrund mit Sand oder Erdreich nivellieren und verdichten. Eine Abdeckung mit Wurzelvlies trennt den Belaguntergrund vom Erdreich und verhindert das Durchwachsen von Unkraut.

POSE À SEC SUR GRAVIER

TROCKENVERLEGUNG AUF KIES

Riposizionabile. Per traffico pedonale o con cicli. Modalità di posa utilizzabile su terreno e anche su solai o massetti rigidi.
Allows repositioning. For use by pedestrians or cyclists. Method suitable for use on soil and also on flat roofs and solid screeds.
Repositionnable. Pour trafic de piétons ou vélos. Méthode de pose applicable en pleine terre, sur planchers ou chapes rigides.
Umverlegbar. Für den Fußgänger- und Fahrradverkehr geeignet. Verlegeverfahren geeignet für den Erdboden sowie für Betonplatten oder Estrich.

IT SOTTOFONDO

Posizionare uno strato di ghiaia indicativamente di 10cm (lo spessore migliora il drenaggio) utilizzando ghiaietto a granulometria media (circa 30-40 mm). Livellare con una staggia e compattare accuratamente, eventualmente utilizzando una piastra compattatrice meccanica. In caso di posa a ghiaia su massetto opportunamente impermeabilizzato, è sufficiente uno strato inferiore di ghiaia.

POSA

Appoggiare le lastre secondo il piano di posa, in caso di posa ravvicinata è possibile utilizzare distanziatori specifici, lasciando sempre una fuga minima di 4-5mm. Per eventuali aggiustamenti si può utilizzare un martelletto in gomma bianca.

FUGA

Per fughe di 4-10mm è consigliabile l'uso di un fugante in sabbia polimerica, compatta ma drenante, specifica per questi impieghi. In alternativa lasciare vuote o riempire lo spazio con sabbia lavata. In caso di lastre con posa molto distanziata (4-5cm) gli spazi sono riempiti con ghiaia di adeguata granulometria.

EN SUBSTRATE

Lay a level of fine gravel (particle size 30-40 mm) about 10 cm deep (a deeper layer means better drainage). Level with a straightedge and compact thoroughly, with a mechanical compactor if necessary. When installing on gravel over a waterproofed screed, a thinner layer of gravel is sufficient.

INSTALLATION

Arrange the slabs in accordance with the chosen layout; if they are installed close together the specific spacers can be used, always leaving a joint of at least 4-5 mm. A white rubber hammer can be used for any adjustments.

JOINTS

Joints of 4-10 mm should be filled with a polymer sand filler, specifically for installations of this kind, which is compact but still allows drainage. Otherwise, leave the gaps empty or fill them with washed sand. When slabs are installed with very large gaps (4-5 cm), these should be filled with gravel of suitable particle size.

FR SUPPORT DE POSE

Mettre une couche de gravier d'approximativement 10 cm d'épaisseur (l'épaisseur optimise le drainage). Utiliser un gravier de moyenne granulometrie (environ 30-40 mm). Niveler avec une règle à niveau, puis bien tasser avec, le cas échéant, une plaque mécânique. Pour la pose sur chape correctement imperméabilisée, une plus petite couche de gravier suffit.

POSE

Déposer les dalles selon le schéma de pose. Si les dalles sont posées très près l'une de l'autre, il est possible d'utiliser des croisillons spécifiques, en veillant toujours à laisser un espace minimum de 4-5 mm entre les dalles. Utiliser un maillet en caoutchouc blanc pour les éventuelles rectifications de niveau.

FUGES

Pour les joints de 4-10 mm, il est recommandé d'utiliser du sable polymère, compact mais drainant, tout spécialement prévu pour ce genre de pose. Autrement, laisser les joints vides ou les remplir avec du sable lavé. Si les dalles sont posées très loin l'une de l'autre (4-5 cm), remplir les joints avec du gravier de granulométrie appropriée.

DE UNTERGRUND

Eine etwa 10 cm dicke Kiesschicht (für eine bessere Drainage) mittlerer Korngröße (30-40 mm) aufschütten. Mit einer Latte abziehen und gründlich, ggf. mit einer Rüttelplatte verdichten. Bei Verlegung im Kiesbett auf entsprechend abgedichtetem Estrich ist eine dünne Kiesschicht hinreichend.

VERLEGUNG

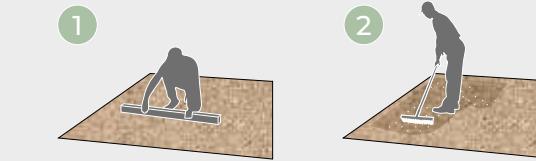

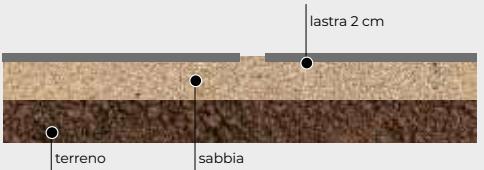

Die Platten entsprechend dem Verlegeplan auflegen. Bei nah aneinander liegenden Platten sind spezielle Fugenkreuze zu verwenden und soll stets eine Fugenbreite von mindestens 4-5 mm gewahrt werden. Etwaige Korrekturen können mit einem Gummihammer vorgenommen werden.

VERFUGUNG

Für 4-10 mm breite Fugen wird ein kompakter und zugleich wasserableitender Polymerfugensand empfohlen. Andernfalls die Fugen leer lassen oder mit gewaschenem Sand verfüllen. Bei großflächig verlegten Platten (4-5 cm) sind die Plattenzwischenräume mit Kies von entsprechender Körnung zu verfüllen.

POSA A SECCO SU SABBIA *

DRY INSTALLATION ON SAND

IT PREPARAZIONE

Livellare la zona da pavimentare aiutandosi con una staggia.

EN PREPARATION

Level the zone for paving with the aid of a straightedge.

FR PRÉPARATION

Avec une règle à niveau, niveler l'endroit où les dalles seront posées.

DE VORBEREITUNG

Den vorgesehenen Belagbereich mit einer Latte nivellieren.

UNTERGRUND

Es wird ein Sandbett mit einer Dicke von mindestens 5-10 cm empfohlen.

VERLEGUNG

Die Platten verlegen. Die Platten sind mit Hilfe von Fugenkreuzen oder einem Stab auszurichten. Die Ebenheit mit einer Latte prüfen. Etwaige Korrekturen können mit einem Gummihammer vorgenommen werden.

VERFUGUNG

Die Fugen zwischen den Platten mit Sand verfüllen, um die Stolpergefahr zu unterbinden.

POSE À SEC SUR SABLE

TROCKENVERLEGUNG AUF SAND

Riposizionabile. Per traffico pedonale o con cicli. Per la posa non occorrono specifiche competenze e attrezature. In caso di possibile uso senza calzature, utilizzare esclusivamente colori chiari.

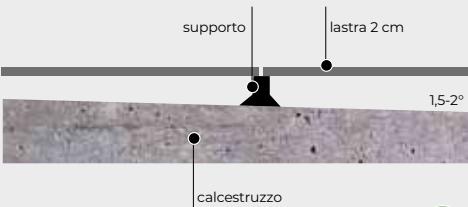

Allows repositioning. For use by pedestrians or cyclists. No specific skills or equipment are required for installation. If barefoot use is expected, use light colours only.

Repositionnable. Pour trafic de piétons ou vélos. La pose n'exige pas de compétences ni d'outils spécifiques. En cas d'utilisation sans chaussures, n'utiliser que des couleurs claires.

Umverlegbar. Für den Fußgänger- und Fahrradverkehr geeignet. Für die Verlegung sind keine besonderen Kenntnisse und Werkzeuge erforderlich. Bei eventueller Barfußnutzung sind helle Farben empfehlenswert.

POSA SOPRAELEVATA *

INSTALLATION AS A RAISED PAVING

POSE SURÉLEVÉE

VERLEGUNG AUF STEZLAGERN

Sistema leggero e funzionale, con lastre ispezionabili. Migliora l'isolamento termico e permette di alloggiare tubi e cavi. A lightweight, convenient system, with slabs which can be lifted off for inspection. It improves thermal insulation and is able to accommodate pipes and cables. Système léger et pratique, avec espace technique facile à inspecter. Optimise le calorifugeage et permet le passage des tuyaux et câbles. Leichtes, praktisches System mit inspizierbaren Platten. Verbessert die Wärmeisoliierung und ermöglicht die Verlegung von Leitungen und Kabeln.

AVVERTENZE

Avvertenza: rischio rottura. Nell'eventualità che un oggetto pesante cadesse su una lastra appoggiata su supporti, l'impatto concentrato potrebbe causare la rottura, creando un potenziale rischio per eventuali passanti. La tabella di pag. 119 suggerisce alcune misure cautelative, la cui idoneità specifica deve essere valutata da un professionista abilitato in base al contesto e alle normative locali.

Avvertenza: rischio sollevamento. In terrazze e pavimentazioni esterne poste in appoggio, è possibile che l'azione di un forte vento possa sollevare e muovere le lastre, con il pericolo di causare danni a cose o persone. NovaBell raccomanda di verificare con un professionista abilitato la tipologia di posa, le condizioni ambientali specifiche e le normative locali, adottando soluzioni idonee a evitare ogni rischio.

CAUTION

Caution: risk of breakage. In the event of a heavy item falling on a slab resting on pedestals, the concentrated impact of the object falling from some height could cause it to break, with a potential risk for anyone in the vicinity. The table on page 119 suggests some appropriate precautions, the specific suitability of which must be assessed by a qualified professional in relation to the context and local regulations.

Caution: risk of lifting. When outdoor patio coverings and pavings are installed without glue or fasteners, strong winds may lift and move the slabs, with the risk of personal injury or damage to property. NovaBell urges customers to check the installation method, specific weather conditions and local regulations with a qualified professional and adopt solutions which avoid all risks.

MISE EN GARDE

Mise en garde : risque de rupture. Si un objet lourd tombait sur une dalle reposant sur des plots, l'impact concentré de cette chute depuis une certaine hauteur pourrait en causer la rupture, créant ainsi un risque potentiel pour d'éventuels passants. Le tableau de la p. 119 propose certaines mesures de précaution, dont la conformité spécifique doit être évaluée par un professionnel habilité, en fonction du contexte et des réglementations locales.

Mise en garde : risque de soulèvement. Sur les terrasses et sols extérieurs posés en appui, les dalles peuvent être soulevées et déplacées sous l'effet de la force du vent, risquant ainsi de causer des dommages aux biens et aux personnes. NovaBell recommande de vérifier avec un professionnel habilité le type de pose, les conditions spécifiques de l'environnement ainsi que les réglementations locales, en adoptant des solutions adéquates permettant d'éviter tous les risques.

WARNING

Warnung: Bruchrisiko. Wenn ein schwerer Gegenstand aus einer bestimmten Höhe auf Stelzlagern aufliegende Platte herabfällt, kann diese durch den konzentrierten Aufschlag brechen, was ein potentielles Risiko für zufällig anwesende Personen darstellt. Die Tabelle auf S. 119 enthält einige Vorsichtsmaßnahmen, die jeweils nach Beurteilung eines Fachmanns unter Berücksichtigung der Umgebungsbedingungen und örtlichen Bestimmungen anzuwenden sind.

Warnung: Risiko der Abhebung. Bei Terrassen und ungebunden verlegten Bodenbelägen im Außenbereich können sich die Platten durch Einwirkung von starkem Wind heben und verschieben, wodurch die Gefahr von Personen- oder Sachschäden besteht. NovaBell empfiehlt deshalb, mit einem Fachmann die Verlegeart, die Umgebungsbedingungen und die örtlichen Bestimmungen zu überprüfen und geeignete Lösungen zur Vermeidung jeglichen Risikos anzuwenden.

SOPRAELEVATA CON BARRE PER FORMATI MISTI *

RAISED WITH BARS FOR MIXED SIZES

SURÉLEVÉE AVEC BARRES POUR FORMATS MIXTES / AUFGESTELZTE VERLEGUNG MIT METALLSTREBEN FÜR GEMISCHTE FORMATE

i Grazie ai supporti regolabili con barre metalliche, il sistema permette la posa in sopraelevato per esterni di formati "a doghe" e la combinazione di formati diversi (ad esempio per lastre legno o pietra).

Thanks to the adjustable pedestals with metal bars, the system allows "plank" sizes to be installed as raised pavings outdoors, and the combination of different sizes (for wood or stone slabs, for example).

Grâce aux plots réglables avec barres métalliques, le système permet la pose surélevée pour extérieurs aux formats « à lattes » et la combinaison de formats différents (par exemple pour les dalles bois ou pierre).

Dank der verstellbaren Stelzlagern mit Metallstreben ermöglicht das System die aufgestelzte Verlegung in Außenbereichen von Formaten im Parkettstil und die Kombination verschiedener Formate (z.B. für Holz- oder Steinplatten).

TAGLIO E MOVIMENTAZIONE / CUTTING AND HANDLING

COUPE ET MANUTENTION / SCHNEIDEN UND HANDHABEN

photo RUBI® Tools Italia

photo La Brevetti Montolit SpA

IT TAGLIO E FORATURA

Per tagliare le lastre in gres porcellanato 20mm è necessario impiegare utensili (a secco o ad acqua) con dischi diamantati specifici per gres porcellanato, facilmente reperibili sul mercato.
Per forare le lastre in gres porcellanato 20mm utilizzare punte a tazza specifiche per gres porcellanato.

FR COUPE ET PERÇAGE

La coupe des dalles en grès cérame 20 mm nécessite l'utilisation d'outils (à sec ou à eau) munis de disques diamant pour grès cérame que l'on trouve dans le commerce.
Pour percer les dalles en grès cérame 20 mm, utiliser des scies cloche diamantées pour grès cérame.
Dans les deux cas, respecter scrupuleusement les indications du fabricant des outils et des abrasifs.

IT MOVIMENTAZIONE LASTRE

Per facilitare la movimentazione delle lastre sono disponibili utensili con maniglia, che permettono di sollevare e muovere le lastre in modo agevole e sicuro.

FR MANUTENTION DES DALLES

Pour faciliter la manutention des dalles, il existe des outils munis d'une poignée permettant de les soulever et de les déplacer en toute sécurité.

EN CUTTING AND DRILLING

20 mm porcelain stoneware slabs must be cut using wet or dry tools with diamond discs specifically recommended for porcelain stoneware, widely available on the market. When drilling holes in 20 mm porcelain stoneware, use diamond core bits specifically for porcelain stoneware. In both cases, comply strictly with the instructions provided by the tool, disc and bit producers.

DE SCHNEIDEN UND HANDHABEN

Zum Schneiden der Platten aus Feinsteinzeug 20 mm sind Trocken- oder Nassschneider mit speziellen Diamantscheiben für Feinsteinzeug erforderlich, die problemlos im Fachhandel erhältlich sind.
Zum Bohren der Platten aus Feinsteinzeug 20 mm spezielle Lochsägen für Feinsteinzeug verwenden. In beiden Fällen sind die Angaben der Hersteller der Werkzeuge und Schleifmittel zu befolgen.

EN HANDLING SLABS

Tools with handles are available for the easy, safe lifting and handling of slabs.

DE HANDHABUNG DER PLATTEN

Zur leichteren Handhabung der Platten gibt es Werkzeuge mit Griff, die ein bequemes und sicheres Heben und Bewegen der Platten ermöglichen.

PULIZIA E MANUTENZIONE

CLEANING AND MAINTENANCE

REINIGUNG UND WARTUNG / NETTOYAGE ET ENTRETIEN

IT Per la pulizia dei pavimenti Outwalk 20/30 si consiglia di utilizzare solo acqua e detergente neutro facilitando il drenaggio dell'acqua con una spazzola di gomma

In situazioni di sporco estremo si consiglia l'utilizzo di idropulitrice ad alta pressione.

EN To clean Outwalk 20/30 floors it is recommended to use water and neutral detergent only, facilitating water drainage with a rubber brush

In situations of extreme dirt, we recommend the use of a pressure washer.

FR Pour le nettoyage des sols Outwalk 20/30, il est recommandé d'utiliser uniquement de l'eau et un détergent neutre, facilitant le drainage de l'eau avec une brosse en caoutchouc.

En cas de saleté tenace, nous recommandons l'utilisation d'un nettoyeur haute pression (karcher).

DE Für die Reinigung der Outwalk 20/30-Böden empfehlen wir, nur Wasser und ein neutrales Reinigungsmittel zu verwenden und um den Abfluss vom Wasser zu erleichtern, mit einer Gummibürste zu arbeiten.

Bei extremer Verschmutzung wird die Verwendung eines Einscheiben Reinigungsgerätes und stärkeren Reinigungsprodukten empfohlen.

The international reference standards: ISO - EN

The values of the main technical characteristics measured on our products, compared with international standards, are clearly shown and reproduced on our contractual documents (catalogs, price lists, etc.). The values given in this document are common to groups of articles or series of our tiles and therefore are to be used as a guide for a first orientation in choosing the product. If required, the specific values for a given product an a determined supply can be provided depending on its intended use, when formally brought to our attention by notice in writing.

| Characteristics and Test methods | Requirements EN 14411 ⁽¹⁾ - G/ISO 13006 ⁽²⁾ - G | Our general values |
|-----------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------|
| Determination of water absorption (ISO 10545-3) | Average value $E_b \leq 0,5\%$ / Individual maximum $\leq 0,6\%$ | ≤ 0,03% Average value and individual maximum |
| Classification | Definition § 3.2 and § 3.7 | BI_a - Porcelain tiles |
| 20 mm Physical properties | | Physical properties |
| Modulus of rupture (ISO 10545-4) | Average $\geq 35 \text{ N/mm}^2$ | ≥ 50 N/mm² |
| Breaking strength - (ISO 10545-4) | Average $\geq 1300 \text{ N}$ for thickness $\geq 7,5 \text{ mm}$ Average $\geq 700 \text{ N}$ for thickness $< 7,5 \text{ mm}$ | Complies |
| Flexion resistance and breaking load - (EN 1339-F) P-Average Breaking Strength | Classes according to EN 1339 - § 5 (3) | ≥ U11 ≥ 12.000 N ≥ 50 N/mm² |
| T-Average of modulus of rupture | | |
| Compressive strength (cubic sample 2 cm side) | NA | ≥ 200 N/mm² |
| MOHS hardness scale (ex EN 101 / BS 6431-13) | NA | ≥ 8 |
| Resistance to surface abrasion (ISO 10545-7) | Abrasion class and cycles passed | Class 0-5 |
| Resistance to deep abrasion (ISO 10545-6) | Max volume abraded $< 175 / \text{mm}^3$ | < 130 / mm³ |
| Raccommended use | Novabell criterion | Class 5 (see Annex N-ISO 13006 / EN 14411) |
| Color resistance to UV light (Din 51094) | ... | Resistant |
| Coefficient of linear thermal expansion (ISO 10545-8) | Declared value ⁽¹⁾ / Test method available ⁽²⁾ | $< 7,1 \times 10^{-6} ^\circ\text{C}^{-1}$ |
| Thermal shock resistance (ISO 10545-9) | Pass according to EN ISO 10545-1 ⁽¹⁾ / Test method available ⁽²⁾ | Complies |
